OUR BIG 4 TRAILS

**ARKLOW TRAILS**

With names such as the Pet Cemetery Trail and Dead Cats Trail, you can be certain of an interesting ride. Four kilometres north from Collie off the Munda Biddi Trail and nestled adjacent to Harris River Estate Winery, the Arklow Trail Network is the place to enjoy the spectacular jarrah forest by bike. Ray's is a fun single track to ride with flowing bermed sections with small jumps, technical short climbs and log crossings. The most popular trail is Dead Cats which is a linking trail from Mornington Road to Ray's Trail on Harris River Road. It's flowing, fun, and suitable for beginners and pros alike. The hand-cycle and family-friendly Arklow Adaptive is the latest edition to the network.

**MOUNT LENNARD TRAILS**

Pile Road as its affectionately known is 40kms and 7 trails of fun with spectacular views of the lower Collie River valley. The ups are consistent but gentle; the downs require a little pedal-power to get up to top speed. Compared to modern trails these are a bit more organic with less machine-made trail and jumps. The one exception is the jump area at the bottom of this network which gives riders a thrill-experience and a place to push themselves with doubles and table tops. The Grizzly Trail is the pick, with a Top Trail rating.

**WELLINGTON NATIONAL PARK TRAILS**

The beautiful forests and valleys of the National Park are an adventure mecca for bushwalkers and mountain bike riders. These popular single and dual-use trails traverse through stunning jarrah and marri forest. Less than 30minutes from Bunbury and 15 minutes from Collie, the trails can be completed by moderately fit riders in one day or upgraded into an overnight adventure by staying in nearby rustic cottages or under the stars in glamping tents by Potters Gorge or Honeymoon Pool.

**COLLIE WAGYL BIDDI TRAILS**

Love MTB, but not keen on heading too far off the beaten track? Then Wagyl Biddi in the heart of bike-friendly Collie is your answer. Starting from Soldiers Park, the 9-kilometre trail consists of connecting loops, ranging from handcycle, beginner to intermediate. According to legend, the mythical rainbow serpent (Wagyl) created the Collie, Preston and Brunswick Rivers. Biddi means 'path through the forest' in the Noongar language. Novice riders should leisurely cruise the banks of the Collie River on the Wilman section. While experienced riders will be kept busy, flying over rocks and dancing through trees on the Marri Meander trail, named due to the prevalence of marri forest. The Sprocket Rocket Trail is also a 'universal grin creator'.
